

JAGUAR XJ

SPECIFICATION AND PRICE GUIDE

JANUARY 2018

THE ART OF PERFORMANCE

THE CONCEPT OF XJ

XJ is Jaguar's pinnacle saloon car, the perfect combination of cutting-edge technology, sporting vehicle dynamics, and opulent luxury. Its assertive styling turns heads with an upright grille and energy efficient full-LED headlights that give prominence to the unique, 'Double J' Daytime Running Light design. While state-of-the-art systems keep you informed and safe, XJ's beauty and craftsmanship are brought together with the power and driving experience you expect from a Jaguar. In the cabin, there's space to stretch out, relax or work with the latest connected technology, InControl Connect Pro. XJ has everything to make your journey more productive, entertaining and relaxed.

IMPORTANT NOTICE

Jaguar Land Rover Limited is constantly seeking ways to improve the specification, design and production of its vehicles and alterations take place continually. While every effort is made to produce up-to-date literature, this brochure should not be regarded as an infallible guide to current specifications, nor does it constitute an offer for the sale of any particular vehicle. Vehicles shown in this brochure are from the Jaguar Global range. Specifications, options and availability will vary between markets and should be verified with your local Jaguar Retailer. Distributors and retailers are not agents of Jaguar Land Rover Limited by any express or implied undertaking or representation. Comparisons are based on manufacturer's own data and testing prior to publication.

ENVIRONMENTAL INNOVATION AT JAGUAR

XJ, XE, XF, F-PACE and F-TYPE's innovative use of lightweight aluminium, which incorporates up to 50% closed-loop recycled material from the manufacturing process of the body structures, provides considerable performance benefits.

This includes improved fuel consumption and less CO₂ emissions during the use phase of the Life Cycle due to lighter structures. Our on-going target is to ensure scrap aluminium reclaimed from our stamping process is to be segregated and recycled through a closed loop system and incorporated back into the same grade quality aluminium sheet, therefore reducing CO₂ emissions, versus the use of virgin aluminium sheets, during the production phase of the Life Cycle. Jaguar is committed to reducing dependency on fossil fuels, using fewer natural resources and creating less waste as part of our approach to responsible and sustainable business development, called Environmental Innovation. The company plan includes ongoing reduction in CO₂ emissions & the use of natural resources and at the end of 2014 we have achieved a 28% reduction in operating CO₂ emissions, 25% in the Company's European fleet average tailpipe emissions, 75% in waste to landfill, logistics efficiencies (18%) and water consumption (10%), all based on per vehicle built since 2007. In addition the manufacturing assembly CO₂ emissions of each Jaguar built in the UK since 2009, is 100% offset as part of our 2020 strategy for carbon neutral manufacturing assembly and since 2013 carbon-for-development projects form a key part of the company's Global Corporate Social Responsibility (CSR) programme.

For each tonne of CO₂ emitted in the assembly process, the company invests in emissions reductions projects that reduce an equivalent tonne of CO₂ elsewhere and provide social and humanitarian benefits at the same time. Since 2013 the programme has offset 800,000 tonnes of CO₂ and improved the lives of over 2 million people from our award winning Lifeflow carbon-for-water emissions reduction programme. Taking into account the company's global sales growth and increased investment in more efficient operating facilities, we are proud to have delivered and in some cases exceeded our Environmental Innovation targets as planned between 2012-2015. But it doesn't stop there. Our manufacturing facilities have been certified to ISO14001 since 1998 and in 2013 the Company was recognised as the UK's Responsible Business of the Year by leading CR index, Business in the Community.

In 2014 we built on this success through the Queens award for Enterprise in Sustainable Development for 2014. Looking forward, we have developed our 2020 vision for sustainable business growth that focuses on continued improvements in operating & tailpipe CO₂ emissions, carbon neutral manufacturing and zero waste. The company will also improve the lives of 12 million people by 2020 as part of the global Corporate Social Responsibility programme.
